

5 Gallon Stainless Steel Test Measure

The Seraphin® Series E test measure is manufactured of type 300 stainless steel. It is available in any capacity from 5 liters (1 US Gallon) to 40 liters (10 US Gallons). Typical sizes are listed in the specification sheet, however custom capacities are available. Seraphin® no longer manufactures terneplate test measures (see news and events). Our hand held measures provide a true standard of comparison for verifying the metered output of liquid dispensing equipment. They are ideally suited for fuel dispensing and other precision liquid metering applications.

A Seraphin® test measure is easy to use, reliable, low cost way to measure the output accuracy of liquid metering equipment. They are built and calibrated to the latest OIML R-120, API and NIST handbook 105-3 standards. Seraphin's® test measures have served as the filed standard used by most Weights and Measures authorities since 1915.

SPECIFICATIONS

Volumetric Capacity	5 gal
Height	35 in
Additional Options	Metal Carrying Case
Standard Features	<ul style="list-style-type: none">• Built to NIST Handbook 105-3 Standards, OIML R-120 and Manual of Petroleum Measurement Chapter 4<ul style="list-style-type: none">• Manufactured of Series 300 Stainless Steel• Calibration by Standards Traceable to National Institute of Standards and Technology<ul style="list-style-type: none">• Graduated Neck• Reinforcing bands to prevent distortion when full with liquid and when being transported<ul style="list-style-type: none">• Hand held bail type handle• Rubber grip on test measure handle• Concave bottom of adequate thickness to prevent distortion when filled
Diameter	11 in
Resolution	0.50 in ³
Weight	19 lb
